EDUCATION

Vellore Institute of Technology, Vellore
BTech Computer Science and Engineering

Graduation: Aug 2026
CGPA: 9.09

SKILLS

Languages: Python, C++, Java, SQL, JavaScript, TypeScript

Technologies: MongoDB, Pinecone, Qdrant, LangChain, LangGraph, Tensorflow, Pytorch, Tableau, PowerBI, N8N

Libraries & Frameworks: Scikit-learn, Matplotlib, Numpy, Pandas, Keras, NLTK, BeautifulSoup

MLOps & Deployment: FastAPI, Docker, AWS, GCP, Git, Postman, Hugging Face

WORK EXPERIENCE

Quintinno Labs

Research & Data Intern

Guwahati, Assam

Jun 2025 - Jul 2025

- Designed a cost-efficient automated EV-charging robot prototype using a 30 kW LiFePO₄ battery, ArUco markers, and camera-based object detection; reduced hardware cost by 50% with charge time of 15 minutes..
- Built and evaluated LSTM-based SoC prediction pipelines for Smart BMS; performed EDA on BMS parameters and identified LSTM architectures (hidden units = 55, 92) with best validation performance of RMSE 0.79%

Ashva Wearable Technologies

Technical Content Writer

Remote

Sept 2022 - Jan 2024

- Synthesized findings from 75+ research papers to write 10+ long-form articles on innovations and trends in physiotherapy healthcare and equipment manufacturing for the 'Raftaar' newsletter.
- Strategized interaction across 5 platforms including Instagram, YouTube, Quora, LinkedIn and Reddit and channeled traffic through application of digital marketing concepts like SEO & infographics.

PROJECT EXPERIENCE

"Dreamers" Movie Script Generator

Sept 2025

- Curated a corpus of 2,800 movie scripts and used the Gemini 2.5 flash-lite API to auto-generate movie metadata (theme, genre, character arcs, settings), segmented scripts into scenes using "INT/EXT" delimiters and converted them into a structured JSONL dataset.
- Fine-tuned a Meta Llama 3 model on the generated dataset and integrated the model output with Gemini Veo-3 for automatic trailer generation, producing 8 second video clips.

"Study Easy" ACM-VIT Winter Project Cycle

Jan 2024

- Collaborated and fine-tuned 7.3B parameter Mistral v0 using PEFT - LoRA for summarization and Q&A models trained with college notes for exam preparations.
- Designed a website for easy integration and deployment with auto-text extraction from pdfs, pptx using OCR.

DeFi Wallet Credit Scoring System

July 2025

- Engineered a five-component behavioral scoring framework (Stability, Responsibility, Diversity, Efficiency, Risk Management) using 3,000 on-chain wallet transaction records and extracted 30+ temporal, volume, and behavioral features using pandas/numpy pipelines, normalized with RobustScaler for outlier resistance.
- Implemented weighted aggregation with 0-100 credit scores and validated performance through unsupervised clustering and correlation analysis.

LEADERSHIP EXPERIENCE

Association for Computing Machinery (ACM-VIT)

Secretary

Vellore, India

May 2023 - Present

- Managed 150+ core committee members across 8 domains to enhance ACM-VIT's public image by 67% in followers growth and 30% in monthly impressions across social media handles since May 2023.
- Led the organizing of 22 events with cumulative 5000+ participants and acquired sponsorship close to Rs. 20L.

CERTIFICATIONS

Oracle Generative AI & AI Vector Search Certified Professional
CS50 Introduction to Databases with SQL
Anthropic Introduction to Model Context Protocol
